

Jiasyuan (Serena) Chang

serena.js.chang@gmail.com | (408) 581-2501 | www.linkedin.com/in/serena-chang-878005245

EDUCATION

University of California, Los Angeles (UCLA)

Expected Graduation : 2027

Cognitive Science B.S. (Specialization in Computing); Data Science Engineering Minor

- Cumulative GPA : 3.922 / 4.00
- Relevant Coursework : Natural Language Processing, Machine Learning, Artificial Intelligence, Neural Network Lab, Prototyping Intelligent & Interactive Systems, Databases, Algorithms and Complexity, Computer Science I/II (C++)
- Dean's Honors List: Spring 2024 – Fall 2025

SKILLS

Programming Languages: Python, C++, Java, React, Typescript, SQL, C, R

Tools: Python libraries (NumPy, Pandas, Matplotlib, Scikit-learn, PyTorch), Supabase, FastAPI, Perplexity API, Railway, AWS S3

RESEARCH / PROJECTS

UCLA Human-Computer Interaction (HCI) Research Lab

Researcher (Advisor: Xiang 'Anthony' Chen)

Sept 2025 – Present

MCP for Interaction Patterns [In Progress]

AI Meeting Assistant: Analysis of User Experience

- Exploring user usage and how AI meeting assistants supports user workflows to inform improvement of AI assistants

Research Assistant

Oct 2024 – Present

Hypothesis Evaluation Agent with Reinforcement Learning [In Progress]

Agentic AI to Facilitate Group Discussion

- Explore implementation of AutoGen agents in pipelines, including API integration and architecture design for automation

HALO: Human-AI Collaborative Ligand Optimization

- Developed molecular generation platform, integrated large language models (LLMs), API routing, and database logging
- Built pipeline to effectively filtered out 80% of low-quality molecules generated, improving system efficiency and usability

RAGPPI: RAG Benchmark for Protein-Protein Interactions in Drug Discovery (<https://aclanthology.org/2026.eacl-long.203/>)

- Prepared 50 sets of user study documents and designed figures/tables to effectively communicate experimental results
- Analyzed expert-revised responses and model outputs to guide model improvement and conducted GraphRAG benchmarking
- **Accepted to EACL 2026** (main conference)

Interactive Design Pattern in Generative AI Applications

- Identified 17 interactive design patterns across 20 Generative AI platforms
- Analyzed standalone and embedded Gen AI platforms and highlight differences in user experience and integration strategies

Behavioral Indicators of Overreliance During Interaction with Conversational Language Models (<https://arxiv.org/abs/2602.11567>)

- Conducted 2-hour session and managed 180+ participant communications, ensuring smooth execution and data collection

National Taiwan University Human-Computer Interaction (HCI) Lab

Research Assistant

June 2024 – Sept 2024

- Contributed to backend development of AI-assisted interior design image generation tool to support communication
- Evaluated the performance of Segment Anything Model, IP-Adapter, ControlNet for image processing
- Debugged multi-model integration, improved image processing pipeline, accessed and managed AWS S3 files and data

ACTIVITIES

Association for Computing Machinery (ACM) at UCLA

ACM AI Co-President

Mar 2026 – Present

- Organized largest undergrad community for learning and researching AI
- Lead team of 40 officers and advisors to organize workshops, speaker events, and projects for 200+ active members

ACM AI Officer

Apr 2025 – Mar 2026

- Organized technical and academic events, including 2 hackathons and 3 academic panels, connecting over 250 attendees
